

The groups of Associate Professors Xiaoting Hua and Sebastian Leptihn are looking for suitable candidate for a Postdoctoral Fellowship to investigate the antibiotic resistance mechanism in *Acinetobacter baumannii*.

Workplace is the Sir Run Run Shaw Hospital in Hangzhou. Occasionally, travel to the International Campus of Zhejiang University may be required (~1 h).

This position entails the supervision of students and researchers and active participation in lab work. No teaching is required.

The qualifications are as follows:

- * Medical Microbiology research background, PhD in (medical) microbiology or related discipline, such as structural biology or biochemistry.
- * Fluent in English, not older than 40 years
- * International experience is a plus.
- * First author in publications (primary research data) in respected international journals is a must.
- * Contact details of at least 2 referees must be provided.

The initial contract duration is 3 years.

Salary: According to qualifications, max. 300,000 RMB/ year.

Information on the research can be found here:

Prof. Hua: https://www.researchgate.net/profile/Xiaoting_Hua

Prof. Leptihn: LeptihnLab.org

Information on work and life in China: International applicants will be supported with administrative and daily-life issues such as opening a bank account and getting a mobile phone contract. Assistance in finding accommodation will be provided - apartments for foreign researchers are available. Cost of living in China is rather low.
